wallboxx S (B-5929)

data sheet

suitable for small 4-6 inch wall installation speakers
with a maximum installation depth of 105 mm!

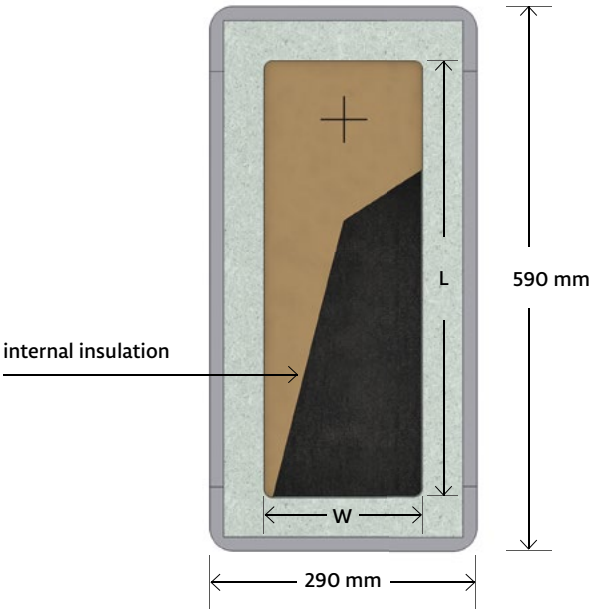

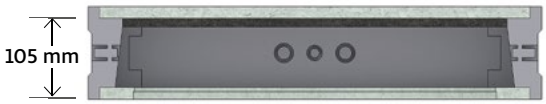

Image showing maximum cut-out

Description
For brick and concrete walls

The wallboxx has been developed to allow a highly professional installation of in-wall speakers for brick- or concrete walls. Thanks to the front and rear MFP boards, the wallboxx will seamlessly integrate into your installation workflow, enabling a quick and easy processing of the walls surface. The body material is framed by EPS to achieve low resonances and improved sound insulation features.

Features and benefits
- modular and flexible product available in 6 sizes
- front and rear boards are made of MFP boards (15 mm)
- fix cut-outs allow for best possible handling of electronic ductwork (20 mm + 25 mm)
- lightweight and at the same time offers a robust stability with excellent shock absorption features compared to other systems
- our materials deliver a better audio reproduction when compared to other boxes that come in wood, sheet metal or plastic
- better insulation with airborne- and structure-borne noise compared to conventional in-wall systems
- Water absorbing protective lid

Included in delivery (per piece)
- 1 wallboxx S (B-5929)
- 1 protective cardboard lid
- 1 installation manual
- 1 cardboard packaging

Typ	wallboxx S (B-5929)
Item number	10139
Dimensions	590 × 290 × 120 mm (L × W × H)
Depth	105 mm
Cut-Out-Dimensions	max. 470 × 170 mm (L × B)
Internal Volume	10,20 l
Fire protection class	B1
Pallet unit	56 Pieces
